About Lanolin

Lanolin is also called wool wax or wool grease. The wax is secreted by the sebaceous glands of wool-bearing animals. A major amount of lanolin is produced from sheep-breed farming, which is specifically raised for the extraction of wool. Wool grease, also called as crude lanolin, is extracted from sheep wool. The obtained wool grease, upon washing and continuous centrifugation, is converted to wax-like substance called as lanolin.

Technavio's analysts forecast the global lanolin market to grow at a CAGR of 5.45% during the period 2017-2021.
