Commercial Banking applications are gaining huge popularity due to increasing internet usage, the convenience of availing daily transactions (discounts, special offers) through mobile banking apps, easy availability of short/long term loan and credit system, supported by the transformation of the Indian economy with several policy initiatives set to be implemented shortly.

India Commercial Banking Market Research Report

However, despite increasing availability of banking services and products in the Indian financial market, the biggest risk to India's banks is the rise in bad loans (bad debts), corruption/scams and the slowdown in the balance sheet growth with depressed profitability. Lack of internet usage education among elderly people and the remote rural population is also a challenge for the industry. Despite these hindrances, the banking sector is focused on offering better customer services and in other technology infrastructure developments. This will aid in improving the customer's overall experience as well as give banks a competitive edge.
