[Buses and Coaches Market 2017](#)

Buses and coaches play a crucial role in the transportation system for connecting cities through roads. Their demand goes hand in hand with several, mostly region-specific, factors, including demographics, increasing mobility of people, and environmental awareness, as well as public funding. Buses and coaches are cheap and easy to use as compared with other modes of transportation. Their use does not necessarily require the implementation of a specific infrastructure, which makes buses and coaches ideal vehicles for both short- and long-distance services.

The analysts forecast the global buses and coaches market to grow at a CAGR of 4.97% during the period 2017-2021.
