

India Instant Noodles Market latest trends, forecast and market analysis

Market Research Report on India Instant Noodles Market

RAIPUR, CHHATTISGARH, INDIA, November 6, 2017 /EINPresswire.com/ -- Report Sellers has added a new market research report "[Instant Noodles Market in India 2017](#)" to its offerings. The report is an in-depth market study providing accurate market insights including the latest trends, forecast, competitive insights, etc.

The market is expected to witness a steady growth in the coming years due to increasing demand from the urban youth in the country. With the increase in disposable income amongst Indians, per capita income and GDP is also on the rise, leading to growing appetite for premium products in the urban segment. Also, the rise in the consumption of convenience foods is a factor considered for growth. Growing youth segment and working class population can also be considered as a reason for the category's double-digit growth in India.

Private label brands have a low level of market penetration. Presence of a large number of organized and unorganized players in the market and price competitiveness among them is also posing as threats to the industry. Lack of product differentiation and presence of excessive lead levels in instant noodles are also potential threats. Despite these hindrances in the industry, the market is expected to grow, with more players entering the market and actions being taken by regulatory bodies to keep the situation under control and lessen the challenges.
