[Industrial Enclosures Market 2017](#)

An industrial enclosure is defined as a cabinet that protects the electrical, electronic, and mechanical device and its component from hostile environments. It can also be used for systematic cable management in industrial applications. The product segments include metallic and non-metallic industrial enclosures. Metallic industrial enclosures use stainless steel and aluminum that provides high resistance to corrosion and provide long life to industrial enclosures. Non-metallic industrial enclosures are made up of polycarbonate and glass fiber that allow wireless and radio frequency (RF) signal to pass through its solid body.

The analysts forecast the global industrial enclosures market to grow at a CAGR of 5.22% during the period 2017-2021.
