[Dairy Packaging Market in North America 2017](#)

The dairy packaging market in North America is driven by the demand for dairy products in the region. Dairy products play an important role in the North American diet. There is high demand for dairy packaging in North America due to increase in the per capita consumption of dairy products, including cheese, cream, yogurt, and flavored milk. In addition, the increase in technological adoption by the farmers of North America has enhanced the production output as well as the consumption patterns in the region. Dairy products can easily get contaminated when exposed to the atmosphere and can easily catch dirt, which makes them non-consumable by humans.

The analysts forecast the dairy packaging market in North America to grow at a CAGR of 3.31% during the period 2017-2021.
