## [Insulated Glass Market 2017](#)

Insulated glass, also known as double glazing, comprises two or more glass panes separated by a spacer and sealed with the help of a sealant. It helps in temperature regulation and reduces the heating and air conditioning costs. In cold regions, it minimizes condensation of interiors, thereby reducing heating costs. Tinted glasses, silk-screened pattern glasses, and low-E (low-emission) coating glasses are the various types of insulated glasses. Insulated glass offers excellent resistance to impacts, bullets, and sound.

The analysts forecast the global insulated glass market to grow at a CAGR of 8.02% during the period 2017-2021.
