

Family Tree Explorer programs released - Documentation & Presentation of Ancestry Research Results

Soft Xpansion has published programs for ancestry research to discover, manage and present the own family history.

BOCHUM, GERMANY, November 14, 2017 /EINPresswire.com/ -- (Bochum, November 14, 2017) – The new [Family Tree Explorer](#) programs released by Soft Xpansion enable genealogists to collect the results of their ancestor research and to make them available for the whole family and other interested people. Users can display the degrees of relationship and add any desired amount of people to the family. Moreover, images, audio and video files, scanned documents, family crests and text annotations may be used to illustrate the family data. Creating lists of people (family members or witnesses), ancestors and descendants diagrams or printing the family tree with high-quality background graphics is possible as well. A search function with various parameters offers the possibility to find people with all details quickly - even in families with a large amount of members.

Three editions: Premium, Standard and Viewer

Family Tree Explorer is available in three editions: The Premium edition includes the most extensive set of features plus a separate Viewer application. Standard includes no Viewer and fewer features than Premium. The Viewer is a program that owners of the Premium edition may distribute to their family members or other people for free, thus giving them the chance to explore the genealogy results without having to buy one of the other two editions.

FEATURES AT A GLANCE
