

Organic Drinks Market 2017 Global Share, Trend, Segmentation and Forecast to 2020

WiseGuyReports.Com Publish a New Market Research Report On - "Organic Drinks Market 2017 Global Share, Trend, Segmentation and Forecast to 2020".

PUNE, INDIA, November 14, 2017
/EINPresswire.com/ --

The analysts forecast the global [organic drinks market](#) to grow at a CAGR of 16.43% during the period 2016-2020.

With the organic foods and drinks industry continuing to mature, the average size of organic farms has also increased, highlighting a trend toward professional organic farming on a large scale.

One of the main factors behind the positive growth expectations is the increasing consumer awareness of health and environmental issues, including food produced using genetically modified organisms (GMOs). Initially, organic labels were associated with vegetables, milk, and bread and sold as niche products. These are now widely available at natural and organic retailers such as Whole Foods Market and Wild Oats and in mainstream supermarkets. Another important factor is the increasingly aggressive and targeted marketing and promotion by the retail sector, which is likely to intensify further as mainstream retailers move into the organic trade. A similar effect is likely to result from the fact that major food manufacturers are also taking an increasing interest in developing organic product lines.
