

Cyber Insurance Market Size, Investment Feasibility and Industry Growth Rate Forecast 2017 – 2022

WiseGuyReports.Com Publish a New Market Research Report On -"Cyber Insurance Market Size, Investment Feasibility and Industry Growth Rate Forecast 2017 – 2022".

PUNE, INDIA, November 15, 2017
/EINPresswire.com/ --

Cyber-insurance is an insurance product used to protect businesses and individual users from Internet-based risks, and more generally from risks relating to information technology infrastructure and activities. Risks of this nature are typically excluded from traditional commercial general liability policies or at least are not specifically defined in traditional insurance products. Coverage provided by cyber-insurance policies may include first-party coverage against losses such as data destruction, extortion, theft, hacking, and denial of service attacks; liability coverage indemnifying companies for losses to others caused, for example, by errors and omissions, failure to safeguard data, or defamation; and other benefits including regular security-audit, post-incident public relations and investigative expenses, and criminal reward funds.
