## Premature Ejaculation Market: Key Vendor Analysis

The competitive landscape of the premature ejaculation market is concentrated with select players, which occupy a dominant market share. The rest of the market is composed of a plethora of manufacturers offering a generic version of off-label PE drugs.

Innovus Pharma  
Plethora Solutions  
Absorption Pharmaceuticals  
Allergan

Other prominent vendors include Menarini, GlaxoSmithKline, Ixchelsis, Dong-A Pharmaceutical, NeuroHealing Pharmaceuticals.

### Premature Ejaculation Market Dynamics

Emphasis on clinical progress of love hormone receptor antagonists to drive the market growth

Increase in prevalence of chronic diseases, low-effectiveness of non-pharmacological treatment, and a wide accessibility to premature ejaculation OTC drugs and generic off-label drugs are the prime factors that are going to

escalate the market growth during the forecast period. Furthermore, pharmaceutical advances in PE drug formulation technology, emphasis on clinical progress of love hormone receptor antagonists, and launch of premature ejaculation treatment awareness campaigns are the latest trends that are likely to positively impact the market. The report also provides the key restraints of the market.

The topical PE drugs market is expected to witness growth at a higher pace than the oral PE drugs market”

*Shravy, Sr. Analyst*

### Premature Ejaculation Market: Segmental Overview

The amide anesthetics segment is the fast-growing segment in terms of mechanism of action.

The oral drug segment to remain the dominant market in terms of route of administration. The topical PE drugs market is expected to witness growth at a higher pace than the oral

PE drugs market. However, the oral PE drugs market is likely to retain its market share until the end of the forecast period.

In terms of mechanism of action (MOA), the global PE market broad segments include SSRIs, PDE5 inhibitors, and amide anesthetics. In 2016, the SSRIs segment dominated the market. This segment is anticipated to retain its dominance till the end of forecast period. The amide anesthetics segment, which occupied low share in 2016, is anticipated to witness higher growth than the other drug MOAs segment during the period 2016-2022.

Route Administration (Topical therapies, Oral therapy)

Mechanism of Action (SSRI, PDE5 inhibitors, Ester/Amide anesthetics)

### Premature Ejaculation Market: Geographical Analysis

North America to remain the largest market followed by Europe

The premature ejaculation market in North America is the largest due to high prevalent PE population. The US occupies approximately 90% of the PE market in North America due to the high population density and comparably higher utilization of off-label and OTC PE products. Similarly, the UK, Germany, France, Spain, and Italy are the leading markets for PE therapies in the European

region. The market in APAC is likely to witness the highest growth rate during the forecast period. A significant increase in PE incidence due to growing burden of chronic conditions, which, in turn, is associated with the high risk of PE occurrence is expected to boost the market growth in this region. The prevalence of PE in the Middle East countries and Latin America is estimated to be lowest than other regions. The market, however, is anticipated to witness a moderate growth rate in these regions.
