Report Sellers has added a new market research report "[Textile Dyes Market: Latest Trends, Analysis and Forecast from 2017-2022](#)" to its offerings. The report is an in-depth market study providing accurate market insights including the latest trends, forecast, competitive insights, etc.

Textile Dyes market 2017-2022

According to the report, Textile Dyes market is projected to grow at a CAGR of 7.25% over the projected period to reach US\$7.982 billion by 2022, from US\$5.625 billion in 2017.

Textile dyes are used in the process of adding colors to textile products like fibers, yarns, and fabrics. Preference of natural dyes, growing demand for colored textiles and fibers and strong research and development investments in plant based dyes are some of the key factors driving the market growth, whereas stringent environment laws, production overcapacity and raw materials price volatility are restraining the market growth. Growing demand for environment-friendly products is boosting the use of natural dyes in textile applications, which is further contributing to the demand of textile dyes.
