[High Pressure Grinding Roller Market 2017](#)

The high pressure grinding roller (HPGR) is a flexible crushing solution, which is suitable for both new installations and upgrades. It is used to crush feed material at a high pressure to obtain a refined output. The process has been in existence for many years. Though it was initially used in the cement industry, it later found applications in the mining industry, especially in the extraction of diamonds and in hard rock applications.

The analysts forecast the global high pressure grinding roller market to grow at a CAGR of 4.81% during the period 2017-2021.
