<u>Motorcycle Tires Market Analysis And</u> <u>Forecast</u>

About Motorcycle Tires

Tires are made up of natural rubber or a combination of both natural and synthetic rubber. Motorcycle tires are an integral part of the vehicle, which

help to maintain adequate grip, balance, safety and increases the ride comfort of the rider. The global motorcycle industry is broadly categorized into two segments, where one segment consists of high-performance motorcycles (considered as a luxury) and the other segment consist of two-wheelers used for commuting. Both these segments operate under contrasting market dynamics with different customer behavior and value chains. The premium segment is witnessing a steady growth owing to the growing culture of racing and touring motorcycling in mature markets, such as the US, Japan, and Western Europe. On the contrary, the commuter segment of the motorcycle industry is witnessing healthy growth rate offering high volumes, which is contributed by countries, such as India and China. These two countries account for over 75% of the global motorcycle market.

The total market comprises both OEMs and aftermarket. Motorcycle production data is considered to calculate both aftermarket and OEM market. For aftermarket, an average replacement time of 5 years is considered.

Technavio's analysts forecast the global motorcycle tires market to grow at a CAGR of 4.39% during the period 2017-2021.
