[Sunflower Oil Market 2017](#)

Sunflower oil is a vegetable oil that is a combination of monounsaturated and polyunsaturated fats, with low saturated fat levels. This non-volatile oil is extracted from sunflower seeds. This vegetable oil has become popular among consumers owing to its light color and high smoke points. The nutritional composition of sunflower oil makes it ideal for food and industrial applications. In addition to this, the negative perception about palm oil has also helped increase the sunflower oil demand in regions like North America (especially the US) and Western Europe. Due to its popularity as an edible oil, sunflower oil accounts for more than 75% of the revenue from sunflower crops.

The analysts forecast the global sunflower oil market to grow at a CAGR of 4.72% during the period 2017-2021.
