Assisted Reproductive Technology in Fertility Clinics Market Analysis And Forecast

About Assisted Reproductive Technology in Fertility Clinics

Infertility is a medical condition that affects both men and women. Generally, a couple is considered infertile when they are unable to conceive after a 12-month period of unprotected sexual intercourse. ART consists of a wide range of procedures that are used to treat infertility in men and women. These procedures are rendered to patients primarily in clinics, which treat infertility and are collectively referred to as fertility clinics.

Technavio's analysts forecast the global assisted reproductive technology market in fertility clinics to grow at a CAGR of 4.36% during the period 2017-2021.
