[Car Fleet Leasing Market in the US 2017](#)

Leasing refers to financing an asset to meet a client's specific need. Car leasing is a system of using a new or used car by paying for a specified period of time. It is similar to renting a car, but for a longer time period. There are two parties involved in leasing a car: lessee (one who pays) and lessor (the owner of the asset who takes the payment). Car leasing can be classified into two types: operating lease and financial lease. Operating leases are short-term leases, wherein the lessee pays the lessor the rental for the period during which the vehicle is on lease. Financial leasing refers to the lease arrangement wherein the lessee indicates their choice of asset and the lessor purchases the asset on their behalf. The lessee repays the cost of the vehicle in monthly instalments. Car leasing is usually available from the following sources: captive finance companies, commercial banks, credit unions, and independent leasing companies.

The analysts forecast the fleet car leasing market in the US to grow at a CAGR of 4.16% over the period 2015-2019.
