About OMS

OMS is used by power distribution operators to identify and resolve power outages. It provides power outage condition and repair status to operators, and it maintains the historical data for the future use. OMS works in combination with GIS, as well as CIS and IVR system. OMS is specifically designed to reduce the financial impact of a power blackout. OMS helps analyze the fault site and magnitude of an outage and hence allowing operators to locate and monitor fault areas.

Technavio's analysts forecast the global OMS market to grow at a CAGR of 4.1% over the period 2014-2019.
