[IT services and BPO Market Analysis And Forecast](#)

About IT services and BPO in government sector

IT services help customers to

accomplish their requirements and improve the business goals and activities while BPO consists of subcontracting the business processes of an organization to a third-party vendor that has expertise in the required domains. IT and BPO services are required in the government sector to manage IT systems and improve business-related processes and methodologies. IT and BPO service outsourcing supports the government sector to perform various functions such as taxation, pensions, asset registration, welfare programs, including financial assistance for the unemployed, and other e-governance initiatives in a cost-effective manner.

Technavio's analysts forecast the global IT services and BPO market in the government sector to grow at a CAGR of 4.78% over the period 2014-2019.

Covered in this report

The report covers the current scenario and the growth prospects of the global IT services and BPO market in the government sector for 2015-2019. To calculate the market size, the report considers revenue generated from the following components:

IT services: ITO, implementation, hardware and software support, and consulting
• BPO: CRM, HRO, and others
