PUNE, INDIA, November 22, 2017 /EINPresswire.com/ --

The analysts forecast the [global railcar movers market](#) to grow at a CAGR of 1.55% during the period 2017-2021.

Railcar mover is a vehicle that is capable of traveling on both rail and road tracks. It acts as a supporting role in the movement of railcars from rail to road or vice-versa. Railcar mover is used more compared with switcher locomotive as it is more economical and convenient in the process of switching operations because of its versatile nature. Railcar movers are extensively used in freight transportation worldwide. Rail freight transportation is used for the movement of raw materials, goods, coal, crude oil, metals and minerals, chemicals, and agricultural products. Railcar movers are widely used as an alternative to locomotives in railway yards, manufacturing, oil refineries and mining industries. The dual usability of railcar movers makes them an economical option. These vehicles have high reliability, consistent performance, and greater fuel efficiency as compared with other modes of transportation.
