Report Sellers has added a new market research report "[3D Sensor Market-Forecasts](#) from 2017 to 2022" to its offerings. The report is an in-depth market study providing accurate market insights including the latest trends, forecast, competitive insights, etc.

Global 3D Sensor Market Research Report

According to the report, [Global 3D Sensor Market](#) is projected to witness a CAGR of 18.65% over the forecast period to reach a total market size of US\$4.611 billion by 2022, from US\$1.961 billion in 2017. Growing demand for 3D-enabled consumer electronics devices along with the falling prices of sensors are some of the major factors driving the market growth. Rising demand for 3D sensors for 3D gaming technology will also fuel the market growth. Integration of nanotechnology with 3D sensors in wide range of applications is also propelling the demand for 3D sensors over the forecast period. However, lack of product differentiation and limited manufacturing excellence will hinder the market growth during the forecast period.

Competitive Insights:

Prominent key market players in 3D Sensor market include OmniVision Technologies, Infineon Technologies, SoftKinetic, Intel Corporation, and Cognex Corporation among others. Market players are adopting various growth strategies to expand their product portfolio and gain a larger market share. In 2016, Occipital acquired Replica Labs that works on apps to give any phone basic 3D scanning capabilities without additional hardware.
