

BoardBookit Releases Android Phone App

New Android Phone App Expands BoardBookit's Focus on a Seamless Mobile Experience

PITTSBURGH, PENNSYLVANIA, UNITED STATES, November 27, 2017 /EINPresswire.com/ -- [BoardBookit](#) Inc., a leading provider of board portal solutions, announced today that it has released BoardBookit for Android Phone, the sixth component of the BoardBookit platform which allows boards of directors to securely and conveniently access their board information. The BoardBookit Android Phone app is fully functional and provides all of the same features as BoardBookit for Android tablet and other mobile devices. The Android Phone app extends BoardBookit's mobile capabilities to truly be the most portable board portal in the marketplace.

BoardBookit Board Portal Software

“The tablet market continues to shrink as a result of better phone design and larger displays, and many consumers are now relying solely on their mobile phones to read news, shop, and even work. BoardBookit's iPhone app usage continues to grow rapidly, and it made sense to provide our boards who use Android phones the same ability to access their meeting information, board materials, and even approvals that require their signatures through their preferred device. BoardBookit for Android Phone allows them this flexibility while still ensuring ironclad security,” says BoardBookit CEO Marion Lewis.”

“

It made sense to provide our boards who use Android phones the same ability to access their information, board materials, and even approvals that require signatures through their preferred device.”

Marion Lewis, CEO

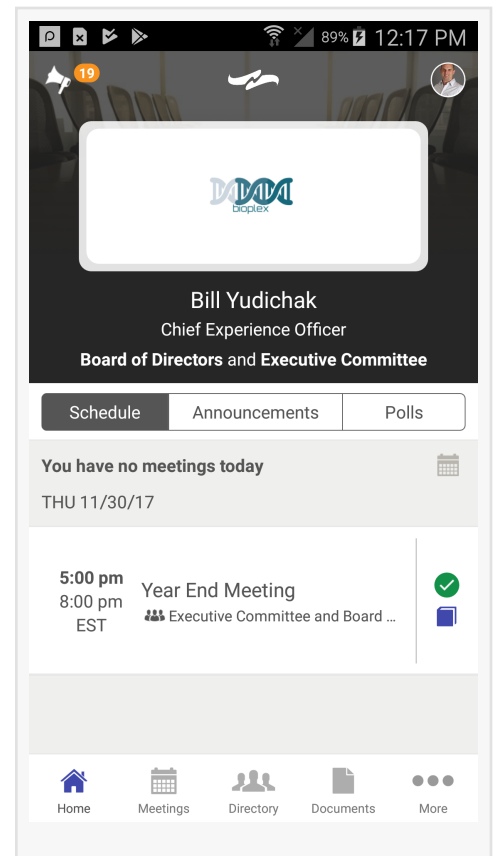

The Android Phone app builds upon BoardBookit's vision of providing simple, quick access for board members to help increase their engagement. This increased engagement

allows directors to serve their organizations by providing more valuable guidance. According to Ms. Lewis, “The BoardBookit Android Phone app was a natural extension of our platform. Every development at BoardBookit begins by answering two questions ‘Does this development further our vision’ and ‘Will this development better serve our users’. Without a doubt, the Android Phone app will help directors across the globe stay better informed and connected for better leadership and governance.”

BoardBookit is the board portal solution that perfectly blends security, functionality, optimal user experience and affordability. Fast, intuitive, and flexible, BoardBookit gives companies the control they require and support when they need it. Designed with input from corporate secretaries, administrators and board members to enhance board engagement, effectiveness and governance, BoardBookit is used by companies across the United States, Canada, Europe and Australia.
