

DigitalPhone.io Launches Wireless Internet Backup Solution to ensure 24x7 Continuity

DigitalPhone.io launches a wireless backup solution that provides customers with continuity in the event of an unexpected disruption to their primary internet.

GREENSBORO, NC, US, November 23, 2017 /EINPresswire.com/ --

[DigitalPhone.io](#), a pioneering hosted telecommunications firm that serves businesses, government agencies, and educational institutions nationwide, has launched a state-of-the-art [wireless backup solution](#) that provides customers with 24x7 continuity in the event of an unexpected disruption to their primary internet connection.

The new [wireless internet backup](#) solution relies on AT&T's powerful LTE network, and uses a discrete LTE-certified cellular modem manufactured by Cradlepoint. Once installed, the solution immediately switches to a fast, reliable and secure wifi network when the primary internet connection goes offline or is under-performing. Customers do not have to manage any configurations, and equipment/data packages can be customized to meet specific connectivity goals and budget considerations.

“

Ensuring telecommunications continuity is a critical obligation for all organizations, including private sector businesses, government agencies, and especially educational institutions.”

*Nicky Smith, DigitalPhone.io's
CEO and Founder*

As a result of the new wireless internet backup solution, DigitalPhone.io's customers are assured that in the event of disruption or degradation to their primary internet connection:

- Credit card, debit card, and all other online transactions will continue to be processed quickly and securely.
- Customers will continue to receive responsive service and support.
- Staff using the VoIP phone system will continue to access all voice and data services, including higher bandwidth activities such as video conferencing.

“Ensuring telecommunications continuity is a critical obligation

for all organizations, including private sector businesses, government agencies, and especially educational institutions to protect staff and student safety,” commented Nicky Smith, DigitalPhone.io's

About Cradlepoint

Cradlepoint is the leading provider of cloud-based wired and wireless WAN networking solutions for Distributed and Mobile Enterprises. Cradlepoint solutions provide the strongest wireless and broadband performance while delivering proven network system interoperability. Cradlepoint's broad family of high-performance router platforms are designed for deployment in mission-critical applications that require 24x7 connectivity. With both integrated wireless and wired WAN and non-integrated versions, our solutions are ideal for distributed and mobile operations and emerging industries that require either remote connectivity or multi-WAN redundancy. Cradlepoint's NetCloud platform enables enterprise network administrators to easily create, monitor, manage, and maintain their distributed network running on different WAN sources from a single location. Founded in 2006, Cradlepoint has shipped over 1.4 million routing platforms and offers solutions certified and promoted by major worldwide carriers. Cradlepoint is a privately held company with headquarters in Boise, Idaho. Learn more at <https://cradlepoint.com/>

About AT&T

Business is changing every day. Companies need the agility to effectively compete and win in their industries. Our solutions help companies adapt to change in near real time and meet the evolving needs of tomorrow. More than 3 million businesses from the largest multinational corporations to small businesses turn to AT&T. We work with companies in all major industries, including financial services, manufacturing, education, healthcare, retail, hospitality and government. We serve nearly all of the Fortune 1000. We also serve more than 60 percent of the FTSE 100 companies, more than 90 percent of the CAC 40 companies, more than 85 percent of the DAX 30 companies and more than 60 percent of the Nikkei 225 companies. We've launched some of the industry's most innovative products and platforms through our highly secure business solutions — including security and mobility services, Internet of Things, Ethernet, VPN, cloud, AT&T NetBond® and AT&T FlexWare. We're also a leader in first responder connectivity. We've been enabling and innovating public safety communications for more than 140 years. And we will continue this commitment as we work with FirstNet to build America's first-ever nationwide public safety broadband network. Learn more at <https://partnerexchange.att.com/>
