

# In-memory Computing 2017 Global Market Expected to Grow at CAGR 36.72% and Forecast to 2021

The analysts forecast the global in-memory computing market to grow at a CAGR of 36.72% during the period 2017-2021.

PUNE, INDIA, November 24, 2017 /EINPresswire.com/ --

Global In-memory Computing Market

Description

WiseGuyReports.Com adds" Global In-memory Computing Market 2017-2021 "Research To Its Database.

In-memory computing (IMC) involves the storage of information in the random-access memory (RAM) of servers instead of the traditional complicated databases that operate on relatively slower disk drives. This performs quicker database management since most of the information is kept in the main memory of the computer, which enables faster access. In-memory computing enables business customers, such as retailers,

banks, and other utilities, to identify the patterns of data, to analyze the huge volumes of incoming data, and to perform the operations fast.

Covered in this report

The report covers the present scenario and the growth prospects of the global in-memory computing market for 2017-2021. The report presents a detailed picture of the market by way of study, synthesis, and summation of data from multiple sources.

Get sample Report @ <u>https://www.wiseguyreports.com/sample-request/2534427-global-in-memory-computing-market-2017-2021</u>

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

The Global In-memory Computing Market 2017-2021, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- IBM
- Oracle
- SAP

Other prominent vendors

- Altibase
- GigaSpaces
- GridGain Systems
- Hazelcast
- Microsoft
- Software
- ScaleOut Software
- TIBCO

## Market driver

- Reduced memory prices and operational costs
- For a full, detailed list, view our report

Market challenge

- Lack of industry standards
- For a full, detailed list, view our report

Market trend

- · Growing use of analytics for decision-making
- For a full, detailed list, view our report

Key questions answered in this report

- What will the market size be in 2021 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?

#### PART 01: EXECUTIVE SUMMARY

#### PART 02: SCOPE OF THE REPORT

#### PART 03: RESEARCH METHODOLOGY

PART 04: INTRODUCTION

Market outline

PART 05: MARKET LANDSCAPE

- Market overview
- Market size and forecast
- Five forces analysis

## PART 06: MARKET SEGMENTATION BY APPLICATION

- Global in-memory computing market by application
- Global in-memory computing market by BFSI
- · Global in-memory computing market by retail
- Global in-memory computing market by telecom & IT
- Global in-memory computing market by healthcare
- Global in-memory computing market by aerospace and defense

## PART 07: REGIONAL LANDSCAPE

- Geographical segmentation
- Regional comparison
- Americas market size & forecast
- EMEA market size & forecast
- APAC market size & forecast
- Key leading countries
- Market opportunity

PART 08: DECISION FRAMEWORK

## PART 09: DRIVERS AND CHALLENGES

- Market drivers
- Market challenges

#### PART 10: MARKET TRENDS

- Growing use of analytics for decision-making
- High demand for cloud-computing services
- Increasing requirements for the real-time analysis of data

PART 11: VENDOR LANDSCAPE

Competitive scenario

## PART 12: KEY VENDOR ANALYSIS

- IBM
- Oracle
- SAP
- Other prominent vendors
