

Global Transformer Core Market is Expected to Reach \$9533 billion by 2023

Market Research Report on Global Transformer Core Market

RAIPUR, INDIA, November 27, 2017
/EINPresswire.com/ --

Report Sellers has added a new market research report "[Transformer Core-Global Market Outlook \(2017-2023\)](#)" to its offerings.

According to Report, the [Global Transformer Core Market](#) is accounted for \$7139 million in 2016 and expected to grow at a CAGR of 4.2% to reach \$9533 billion by 2023. The market is driven by increase in government investment in renewable power projects, rapid urbanization and industrialization in emerging countries and rising demand for electricity from various industries. On the other hand, price fluctuations in electrical steel & ferrite and changing regulatory environment for manufacturers are inhibiting the market growth.

Power transformer type dominated the market share due to increasing development of power grids and power generation projects worldwide. Asia Pacific is expected to dominate the market throughout the forecast period due to the rise in infrastructural and industrial development, in China, India, and other developing economies. China captured more than half of the total share in the Asia-Pacific transformer core market. Latin America is anticipated to gain an investment to furnish the rising demand for electricity. Europe will show substantial growth on account of ongoing aging infrastructure replacement activities in the region.
