Pearl Technologies Announces New FlexSeal™ Product Line
Innovative FlexSeal design simplifies line changes improving productivity

Savannah, New York – November 27,

2017 – Pearl Technologies released its new FlexSeal™ product line designed to simplify sealing line changeovers and improve productivity for a wide range of [intermittent sealing applications](#) with [poly and pouch films](#). Based on the same design innovation as Pearl's industry-leading Flex Unit products,

the FlexSeal offer a low-cost, highly efficient sealing unit for common sealing applications such as top seal, top and bottom seal with or without center platen, and cut-seal with bottom slug removal.

“

Our FlexSeal product extends the ease-of-use benefits of our Flex Unit punch technology to poly and pouch sealing production lines providing an integrated assembly for any poly or pouch bag machine.”

*Nik Green, Senior R&D
Manufacturing Engineer,
Pearl Technologies*

“Our new FlexSeal product offering extends the same ease-of-use benefits of our Flex Unit punch technology to [poly and pouch sealing](#) production lines,” said Nik Green, Senior R&D Manufacturing Engineer, Pearl Technologies. “The FlexSeal provides a fully integrated assembly available in different sizes that is easy to remove and mount on any poly or pouch bag machine.”

The FlexSeal is ideal for bottom gusseting, reinforcing handle holes, strengthening drawstring bag tops and other common sealing applications. The FlexSeal assemblies are available in a variety of sizes and offer full “plug-and-play” compatibility with poly and pouch machines for easy line changeovers. The FlexSeal
