## Key Findings

- Robotic process automation (RPA) is an emerging form of clerical automation technology that is based on the notion of software robots or artificial intelligence..
- Companies are investing in new locations, preferably near shore, in order to overcome barriers such as working and collaborating with partners and teams in different time zones.
- Business process management (BPM) and BPO are evolving and converging to completely transform the way enterprises are doing business. Enterprises are using BPM to manage the interface between lines of business and IT staff.
