

3D Printing in Low-Cost Satellite 2017 Global Market Expected to Grow at CAGR 55.71% and Forecast to 2021

Global 3D Printing in Low-Cost Satellite Market 2017-2021

PUNE, INDIA, November 29, 2017
/EINPresswire.com/ --

WiseGuyReports.Com Publish a New Market Research Report On - "3D Printing in Low-Cost Satellite 2017 Global Market Expected to Grow at CAGR 55.71% and Forecast to 2021".

The analysts forecast the global [3D printing in low cost satellite](#) market to grow at a CAGR of 55.71% during the period 2017-2021.

3D printing involves the synthesis through the addition of successive layers of materials with the support of computerized control technology to design an object or component. This process allows manufacturers to produce small and micro-components of various shapes and size. It also allows the reduction of the overall weight of components, thus substantially reducing the overall weight of a satellite system. The use of 3D printing in the manufacturing of low-cost satellites can ensure a reduction in manufacturing time, overall cost association, and wastage of materials. Therefore, the adoption of 3D printing in the satellite sector is anticipated to reflect long-term sustainability while ensuring enhancement in the overall performance of a low-cost satellite.

Covered in this report

The report covers the present scenario and the growth prospects of the global 3D printing in low cost satellite market for 2017-2021. To calculate the market size, the report considers the new installations.

The market is divided into the following segments based on geography:

- Americas
- APAC
- EMEA

The report, Global 3D Printing in Low Cost Satellite Market 2017-2021, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape and its growth prospects over the coming years. The report also includes a discussion of the key vendors operating in this market.

Key vendors

- Airbus
- Boeing
- Lockheed Martin
- Stratasy

Other prominent vendors

- Aerojet Rocketdyne
- ExOne

Market driver

- Rise in CubeSat development and deployment
- For a full, detailed list, view our report

Market challenge

- Limited economies of scale
- For a full, detailed list, view our report

Market trend

- Economically viable space travel
- For a full, detailed list, view our report

Key questions answered in this report

- What will the market size be in 2021 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?
- What are the market opportunities and threats faced by the key vendors?

- What are the strengths and weaknesses of the key vendors?

Ask Query @ <https://www.wiseguyreports.com/enquiry/1339072-global-3d-printing-in-low-cost-satellite-market-2017-2021>

Table Of Contents – Major Key Points

PART 01: Executive summary

PART 02: Scope of the report

PART 03: Research Methodology

PART 04: Introduction

- Satellite industry

PART 05: Market outline

- Key market highlights
- Key takeaways

PART 06: Market landscape

- Market overview
- Market size and forecast
- Five forces analysis

PART 07: Patent analysis

- Patent trends

PART 08: Market segmentation by satellite part

- Market segmentation by satellite part
- Market share by satellite part

PART 09: Geographical segmentation

- Market share by geography
- Geographical segmentation by revenue
- 3D printing in low-cost satellite market in the Americas
- 3D printing in low-cost satellite market in EMEA
- 3D printing in low-cost satellite market in APAC

PART 10: Decision framework

PART 11: Drivers and challenges

- Market drivers

- Market challenges

PART 12: Market trends

- Economically viable space travel
- Elimination of technical errors
- 3D-printed rocket fuel development

PART 13: Vendor landscape

- Competitive scenario
- Airbus
- Boeing
- Lockheed Martin
- Stratasy
- Other prominent vendors
