India [Office Furniture Market](#)

Description

WiseGuyReports.Com adds" Office Furniture Market in India 2015-2019 "Research To Its Database.

Indian economy has started to pick up and gather momentum after the global economic recession of 2008-2009. Emergence of e-commerce and establishment of various start-ups in the country have led to the growth of the organized retail market in the country. Apart from that, the direct sales approach is paying a lot of dividend to market vendors as the customers still prefer to purchase the products directly from the manufacturers.

Office furniture market is one of the key revenue generators of the overall furniture market in India. It accounted for a 20.45% of market share in 2014. The market is mainly dominated by the unorganized office furniture segment. However, the organized office furniture segment is also growing gradually.

Covered in this Report

This report covers the present scenario and the growth prospects of the office furniture market in India for the period 2015-2019. To calculate the market size, the report considers the revenue generated from the office furniture sales across various regions in India
