

SAGICO's Arion Cervical Featured at Cervical Spine Research Society (CSRS) Annual Meeting

HOLLYWOOD, FLORIDA, USA, November 30, 2017 /EINPresswire.com/ -- Spinal Analytics & Geometrical Implant Co, (SAGICO), an innovative spinal implant company, will be a featured exhibitor at the annual Cervical Spine Research Society (CSRS) in Hollywood, Florida from November 29th thru December 1st. The CSRS 2017 meeting will celebrate 45 years of cutting edge scientific information and programming.

The CSRS is an organization of medical professionals focused on addressing clinical challenges and research of the cervical spine. Its purpose is the exchange and development of ideas and philosophy regarding the diagnosis and treatment of cervical spine injury and disease. SAGICO is a forward-engineering spinal restoration technology company with global surgeon input into products, procedures, protocols and outcomes.

Since its inception, the CSRS mission has always been to exchange and develop ideas and philosophy regarding the diagnosis and treatment of cervical spine injury and disease. These simple core values have been the standard, and have successfully guided the CSRS leadership over the last 45 years. It is the premise on which the CSRS has established its reputation as the authoritative source for cervical spine information and education. The majority of the expected 500 CSRS Annual Meeting attendees are orthopaedic surgeons and neurosurgeons committed to enhancing their clinical expertise. They also have a strong interest in newly advanced surgical techniques and the evolving instrumentation platforms.

It is through these innovations that such products as the SAGICO IBF System, Aria Lumbar and Arion Cervical expandable interbody fusion devices, were so well received during the EuroSpine, Dublin, Ireland exhibition. Surgeons and surgical centers will experience hands-on demonstrations of the SAGICO's Arion and Aria products. The Aria Lumbar and Arion Cervical, with several thousand implants successfully performed in various parts of the world, are now available to surgeons in the USA as a limited market release. SAGICO has recently received 510(k) clearance from the U.S. Food & Drug Administration (FDA).

The proven unique technologies in the Aria Lumbar and Arion Cervical, with unique first-to-market features, are expandable interbody systems comprised primarily of PEEK biomaterials. The Arion Cervical incorporates SAGICO's proprietary TriFix™ technology. The TriFix™ technology in the Arion Cervical is a proprietary patented engineering design that features internal fixation with three distinct points of attached stabilization and will offer increased options for cervical spinal fusion. The unique

construction of Aria Lumbar offers surgeons a superior option for spinal fusion surgery without many of the challenges associated with the surgical procedure. The controlled incremental expansion is designed to allow surgeons the ability to restore disc height and optimize the implant specifically for each patient. Aria Lumbar offers surgeons a unique cutting-edge implant design with multiple height and lordotic options, which will offer surgeons surgical solutions to help achieve optimal sagittal balance in patients.

MORE ABOUT SAGICO: Spinal Analytics & Geometrical Implant Co, (SAGICO) and its principals have many years of spinal industry success spanning multiple continents and more than 60 countries. SAGICO accomplishes its mission with partners throughout the USA, European and PanAsian markets. SAGICO and its affiliates are privately held companies with global partners and shareholders and an aggressive pipeline that includes: novel artificial disk implants (TDR), Porous Titanium interbody technology, Expandable VBR options and unique Pedicle Screw Systems optimized for Complex & Pediatric surgery are just a few of the product lines SAGICO offers. SAGICO's USA corporate based operations, are located in Tampa, Florida.

DISCLOSURE: We at SAGICO are confident in our products and so should our professional surgeons. A surgeon must always rely on his or her own clinical judgment when deciding whether to use a particular medical appliance that may be applicable for a specific patient and adhere to the package insert, product label and/or instructions for use before using any SAGICO product. SAGICO does not diagnose nor does SAGICO offer medical advice on medical conditions and SAGICO requires that all surgeons be trained in the use of any particular product before using it in surgery. The information presented is intended to demonstrate the depth and future of all of SAGICO's product lines. Some products may not be available in all markets because product availability is subject to the regulatory and/or medical practices in individual markets. Please contact SAGICO prior to any medical procedures to learn more.
