Europe [Fleet Management Market](#)

Description

WiseGuyReports.Com adds" Fleet Management Market in Europe 2015-2019 "Research To Its Database.

A fleet management system is formed by the integration of hardware, software, and communication technologies. It provides a platform to fleet operators to efficiently control, track, and monitor commercial vehicles. They improve the overall operational efficiency by reducing the non-value-added activities of the operators. Fuel cards are used for fuel management while driver safety systems monitor driver behavior. Other solutions are employed for locational tracking of vehicles, driver navigation assistance, and ensuring that the operators meet the regulatory standards set by their respective national governments. The major end-users of fleet management systems are specialist logistics companies, such as those in the taxi fleet operator and truck fleet operator sectors.

Covered in this report

To calculate the market size, the report considers revenue generated from the sales of fleet management systems, support and maintenance of these systems, and number of units installed.
