About [Interconnect](#) Device

Interconnect is an electrical connection that connects two or more devices. It derives its applications in the process and discrete industries by facilitating effective interconnection and smooth operations. With the increase in integration of IT and electronics in process and discrete industries, there is a growing need of interconnects which can connect various devices in use and provide real-time information to the operators on shop-floor.

Technavio's analysts forecast the global interconnect market to grow at a CAGR of 8.68% over the period 2014-2019.
