## Description

Wiseguyreports.Com Adds "Microdisplay -Market Demand, Growth, Opportunities and Analysis Of Top Key Player Forecast To 2022" To Its Research Database

The Global Microdisplay market is expected to grow from \$1.12 billion in 2016 to reach \$4.56 billion by 2023 with a CAGR of 22.2%. Growing microdisplays applications and increasing acceptance of portable devices like HUDs and HMDs are some of the factors propelling the market. Adding to this, developing microdisplay technologies, rising demand for high-resolution microdisplays are some key opportunities boosting the market growth. On the contrary, less picture quality, high cost and poor performance at high temperature are some major restraints hampering the market.

By application, industrial and enterprise application is expected to grow at a higher CAGR during the forecast period owing to the growing acceptance of AR glasses for on-the-job training to field workers, field repair services, warehouse management, designing prototype, maintenance and inspection, transportation & freight loading and operations & assembly.

By geography, North America holds the maximum revenue and is expected to grab the top position during the forecast period. Adoption of microdisplay and latest technological advancements made North America to grab the top position. APAC is expected to grow at the highest CAGR for the microdisplay market during the forecast period. Huge consumer market in China & India and the presence of OEMs are the key factors driving the microdisplay market in the region.
