

LogicalDOC Document Management System – now on Synology devices

LogicalDOC is one of the few trusted names that are being used by a large number of companies. Now LogicalDOC is also available in Synology devices!

CARPI, ITALY, December 5, 2017 /EINPresswire.com/ -- Are you looking for an electronic [document management software](#) that is easy to install and can speed up business processes? Well, almost every other document management system promises to do that, but there are very few that deliver on their promises such as [LogicalDOC](#). One can employ LogicalDOC onto their PC as stand-alone or as a shared service. Now you can perform file sharing, find and audit enterprise records and set setting security roles with just a few clicks.

Synology Package

Synology is a global name for advanced and intelligent Network-Attached Storages (NAS). Moreover, as LogicalDOC makes for a perfect companion for your Synology device. It is very easy to stall the document management system in the Synology interface.

“

This year we put all the efforts to multiply the supported platforms and at the end we were able to add Synology with our official presence in their Apps catalogue”

Marco Meschieri

Just follow the instructions, and once LogicalDOC is installed and configured, you only need to restart a couple of times. It is easy to manage external devices from Synology. Synology's products are localized in several languages.

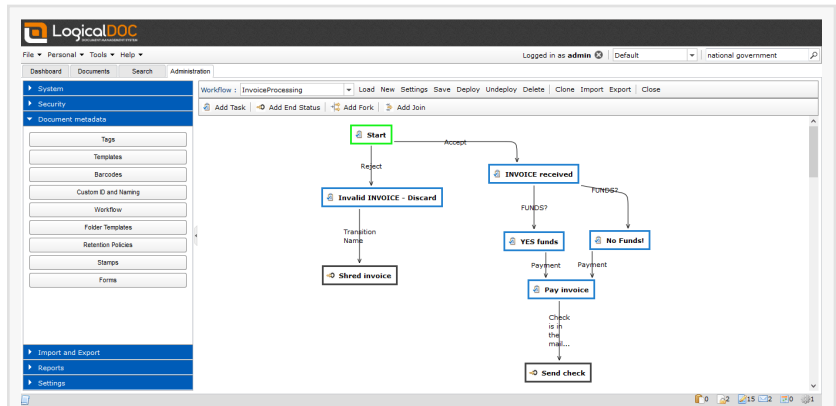

LogicalDOC is best used as a shared service and allows easy management of document changes from one server. It becomes easy to generate and share information within an organization. It is an essential and valuable asset of your business processes. Now, companies can control employee access efficiently and [raise productivity](#). As the software comes with an embedded database, there is no need to install any additional components.

LogicalDOC is used by hundreds of business and organizations to manage the electronic business documents with ease. Thanks to its web-based user interface, now you need not get anxious about setting security roles, finding records or sharing files. Documents with this system are created with a purpose, and it is much easier to track the flow of information and documents during the business cycle. After all, a large number of documents get created for reviews and revisions along with sharing

and collaboration. The software takes care of auditing enterprise records and setting security roles.

Every business relies on valuable intelligence that is essential for a positive workflow. Collaborative workspaces and improved records and their distribution are a sign of success. LogicalDOC is a must for every business model out there because of its efficiency, high portability, and cost-effectiveness. Now you can extend the use and management of your company's documents. LogicalDOC on Synology devices extends its reach and expands its document management applications. Now users will find it easier to collaborate and communicate, via the network-attached storage system like Synology.

Workflow Designer

The screenshot shows the LogicalDOC Document Preview interface. The main window displays a document titled 'Interrupciones Detectores' by NIESSEN. The document content includes a title 'Interrupciones Detectores', a subtitle 'Movimiento MASTER 90° (9501 BL) y 220° (9502 BL)', and a description 'INTERRUPTOR DETECTOR DE MOVIMIENTO DE SUPERFICIE ESTRANEO'. The interface also shows a table of documents with columns for 'Type', 'Size', 'File version', 'Published', and 'Published by'. The table contains the following data:

Type	Size	File version	Published	Published by
docx	18 KB	1.0	26/06/2012 10:26:57	System Administrator
doc	791 KB	1.0	26/04/2011 07:12:05	Admin Admin
pdf	225 KB	1.0	26/02/2012 08:00:43	Rafael El Roman Lozano
pdf	61 KB	1.0	02/12/2010 16:12:29	Admin Admin
doc	128 KB	1.0	06/03/2011 11:09:20	Admin Admin
