

Avatara Has Completed the first Year of Its Successful Launch at wood4floors London

Wood4floors a year working with ter Hürne wood flooring Germany

LONDON, UNITED KINGDOM, December 4, 2017 /EINPresswire.com/ -- Otger Ter Hürne continued his family's tradition of woodworking, dating back to the XIX century, and founded the Ter Hürne floor manufacturing firm in Südlohm, Germany in 1959. Since then the name Ter Hürne has been synonymous with intriguing, top notch floors for individuals who like to express their own individuality and have high expectations. Now Ter Hürne is proud to celebrate the successful first anniversary of their [Avatara MultiSense-Floor](#) with [wood4floors](#)

By mastering wood as raw material for floors and then exploring the possibilities of other materials such as vinyl, Ter Hürne has been able to stand for expertise in wood and floors, technological superiority and a responsible approach to nature while also keeping the original company values as defined by the founder: partnership, down-to-earth, quality and trust rooted in the deep belief that floors are not just a commodity but a product for people.

“

In one of Europe's most modern flooring manufacturing plants, we produce technically sophisticated products, which are natural, sustainable and healthy”

Erwin Ter Hürne

natural appeal achieved by the latest production technology: These floors promote a Healthy Home Environment - Great outstanding natural appearance – authentically tactile – smooth and comfortable to walk on with long lasting resistance.

“In one of Europe's most modern flooring manufacturing plants, we produce technically sophisticated products, which are natural, sustainable and healthy”. – Erwin Ter Hürne

The incorporated underlay improves noise levels and improves warmth. The high definition design is both naturally beautiful and Technologically superior – hallmarks of German manufacture.

Healthy living is also a priority for the company so in order to ensure that every product helps that aspect of every client's house and life, they undergo the stringent examination of the renewed eco-

institut and, They are proud to say, they score remarkably low given the currently permitted pollution limits which has earned them the eco-institut certification. Last but not the least, the marriage of a meticulous manufacturing process with high quality raw materials provides the basis for trouble-free intensive use at all times while the robust and light antiseptic polymer layer renders extraordinary resilience that results in long lasting resistance.
