

Explore the ADC component hazards, risks and safety project elements in HPAPI

SMI's 6th Annual Antibodies and Antibody Drug Conjugates Conference

LONDON, ENGLAND, UNITED KINGDOM, December 4, 2017
/EINPresswire.com/ -- Brief Overview:

SMi's global panel of speakers will strengthen your knowledge in key topics such as high potent ingredients, [ADC](#) payloads, PK-PD technological advancements, warheads and site selectivity, immune-oncological combination therapies and fragment drug [conjugates](#).

Hear from industry leading pharmaceutical companies and biotech's including Pfizer, Genentech, Seattle Genetics, MedImmune, Janssen, Spirogen and more, who will explore key topics in; new and novel payloads, e.g. Antibody Targeted Amanitin Conjugates (ATACs), principles for maximising the drug delivery efficiency and therapeutic index and using fragment conjugates in order to develop a tailored therapy for solid tumours.

Event Spotlight:

The ADC conference will discuss the best ways to approach obstacles faced during different stages of research. While such highly potent compounds can have significant benefits in the treatment of certain medical conditions, they present substantial challenges to the pharmaceutical industry. Most ADCs under clinical investigation contain cytotoxic agents that act by directly inducing DNA damage or exerting clastogenic effects.

Develop commercial potential in ADCs, as Justin Mason-Home, Director, HPAPI Project Services Limited, will be exploring the ADC component hazards, risk assessment, communication and management. Justin will also look into the health and safety project elements in designing and delivering HPAPI projects. - Day 1 | @16:00

For those looking to attend there is currently a £400 early-bird saving, ending December 15th
