

IT Governance launches staff awareness webinar series

ELY, CAMBRIDGESHIRE, UNITED KINGDOM, December 5, 2017 /EINPresswire.com/ -- IT Governance, the leading provider of IT governance, risk management and compliance solutions, is launching a new series of staff awareness webinars to reveal how organisations can tackle learner fatigue, boredom and disengagement by introducing fun, interactive and stimulating experiences throughout the awareness journey.

Alan Calder, IT Governance's founder and executive chairman, said "With recent reports indicating that employees pose the biggest threat to cyber security, there has never been a better time for organisations to ensure that they have an effective staff awareness programme in place".

When it comes to staff awareness, the 'one-size-fits-all' approach of standard staff training programmes aren't appropriate for all organisations, and don't take into account the diverse needs and unique cultures of different businesses.

The first webinar in the series, '[Creating an effective cyber security awareness programme](#)', will be delivered by IT Governance's learning design and solutions consultant Stefanie Retfalvi who will demonstrate how organisations can implement an effective security awareness programme. Taking place on 10th January 2018 from 3:00 – 4:00 pm (GMT).

This webinar outlines how organisations can motivate their audience to commit to a staff awareness campaign, as well as how to evaluate success and continuously improve their programme.
