

Technological Advancements in Surgical Lasers to Foster the Growth of Surgical Lasers Market in Future

Technological Advancements in Surgical Lasers to Foster the Growth of Surgical Lasers Market in Future, According to Research Nester.

BROOKLYN, 11230, UNITED STATES, December 7, 2017 /EINPresswire.com/ -- The global surgical lasers market is segmented into product type such as carbon dioxide, Argon, ND:Yag, diode lasers and other surgical lasers. Among these segments, carbon dioxide segment is projected to grow at highest CAGR in surgical lasers market during the forecast period. Continuous enhancement and development of innovative CO2 surgical lasers are anticipated to impel the growth of carbon dioxide surgical lasers segment. Furthermore, extensive utilization in cosmetic laser treatment is expected to augment the growth of carbon dioxide surgical lasers market.

Surgical Lasers Market

Global surgical lasers market is expected to flourish at a CAGR of 7% over the forecast period. Moreover, the global surgical lasers market is anticipated to garner USD 2.8 Billion by the end of 2024. Growing population of eye related diseases such as cataract is substantially raising the demand for surgical lasers.

North America dominated the overall market for surgical lasers and is expected to continue its dominance over the forecast period. This can be attributed to high expenditure in healthcare infrastructure in the region. Further, availability of advanced surgical lasers and high adoption rate of technologically advanced healthcare equipment is likely to impel the growth of the surgical lasers market in North America region. Asia Pacific is anticipated to witness lucrative growth over the forecast period. Factors such as increasing adoption of surgical lasers by healthcare professionals and favorable government policies are likely to impel the growth of surgical lasers market in Asia Pacific region.

Rising Prevalence of Targeted Diseases

Growth in the number of targeted diseases such as cancer, kidney stones and others across the globe is expected to foster the growth of surgical lasers market in the upcoming years. Further, rising prevalence of glaucoma and cataract is expected to substantially raise the demand for surgical lasers.

Increasing Utilization in Cosmetic Surgery

Continuous technological advancement associated surgical lasers such as enhancement in fiber lasers and diode lasers are anticipated to be the dynamic factor behind the growth of the surgical lasers market. Moreover, rising adoption of technological advanced healthcare equipment in developed and developing nations is expanding the market of surgical lasers.

Although, high cost of surgical lasers, lack of reimbursement policies are some of the factors that are likely to inhibit the growth of the global surgical lasers market in the near future.

The report titled "Surgical Lasers Market : Global Demand Analysis & Opportunity Outlook 2024" delivers detailed overview of the Global surgical lasers market in terms of market segmentation by product type, by application and by region.

Further, for the in-depth analysis, the report encompasses the industry growth drivers, restraints, supply and demand risk, market attractiveness, BPS analysis and Porter's five force model.
