About [Smart Wearable Lifestyle Devices and Services](#)

Smart wearable lifestyle devices are portable devices that are worn or attached to a user's body to measure and analyze parameters related to their well-being. For instance, a wearable device used to measure the quality of sleep helps in analyzing a user's sleeping habits. Similarly, a smart glass enables a user to read a barcode of a product immediately and obtain detailed information about the product. This enhances knowledge about the product and helps the user in making the right decision regarding its purchase.

These devices are portable and perform functions similar to that of smartphones and tablets. Important functions of these devices include messaging, call handling, real-time fitness monitoring, heart-rate monitoring, sleep statistics, calorie count, gym training, monitoring and tracking daily activities, monitoring activities of babies, providing valuable health insights, streaming videos, playing virtual/3D games, image sharing, and entertainment.

TechNavio's analysts forecast the Global Smart Wearable Lifestyle Devices market to grow at a CAGR of 35.14 percent over the period 2014-2019. The Global Smart Wearable Lifestyle Services market to grow at a CAGR of 39.06 percent over the period 2015-2019.
