[Barge Transportation Market in the US 2017](#)

A barge is a flat-bottom boat, used primarily for transportation of dry and liquid bulk cargo on inland waterways. Its carrying capacity is more in comparison to rail cars, trucks, and semi-trailers, thus making it more cost-effective mode of transportation. Majority of barges are propelled with the help of a towboat or other vessels. Primarily, barges are non-mechanical in nature and are usually propelled by towing, but in recent times the market has witnessed a trend of using self-propelled barges

The analysts forecast the Barge Transportation market in the US to grow at a CAGR of 1.97 percent over the period 2015-2019.
