

Homeschooling Resources in the UK - Platform launches children's resources following the National Curriculum

Videos for kids to watch and learn from - developed by a qualified UK teacher, thus ensuring they will help your children in their core skills.

BELFAST , ANTRIM, UNITED KINGDOM, December 11, 2017 /EINPresswire.com/ -- LearningMole focuses on educating children of all ages in the key skills of Maths, English and much more! We offer advice and practical, interactive ideas to help parents challenge, teach and develop their children's skills at home - we love learning through crafts!

Hurricanes for kids - Hurricane information and facts for kids

Lessons are led by an experienced teacher - Michelle Connolly, whom through many years teaching in classrooms and her own children at home, understands the challenges parents face today. Michelle has prepared all the lessons on LearningMole to help education and entertain your children as a support to normal school or home school programmes.

“

Homeschooling and providing resources for kids is an exciting niche ProfileTree is delighted to be able to help with via LearningMole.com Teacher expertise on YouTube to help parents and teachers.”

Ciaran Connolly

Education is essential for creating a better future for ourselves and our children. We should never stop learning and developing and we should never stop helping our children learn and improve. Home is definitely the very first place where children gain their education and parents are their first teachers. Knowledge help children acquire more self-confidence and achieve their goals early on in their lives.

With the recent technological advancement, education has developed right alongside it and transformed in many ways. Nowadays, education is not limited to schools and traditional

forms of learning. The Internet has opened a brand new world for those seeking to learn and gain more knowledge. We can now study through the distance learning programs and educational classes. E-learning is not as expensive as traditional educational methods and it is far more convenient as well. Many universities now offer online classes for people all over the world to access and benefit from. But what about our children's education?

In every child's life, they reach a point where they absorb everything around them. Learning becomes an integral part of their daily routine. They start to develop certain interests and focus on what is

important to their overall growth. That is where we come in. At LearningMole.com, we offer educational resources for kids in order to develop their mental and creative capabilities. On our website, you'll find English lessons, Maths for kids, children's videos, and more interactive materials that make learning a fun experience for children everywhere. Our lessons in English and Maths for kids are divided by age groups, from 3 to 11 years old and more. We also offer lessons in Geography, Science and crafts.

Not only does our website focus on educational material, but we also believe in educating children and preparing them for adulthood. Therefore, we offer [financial education classes for kids](#). Because it is also important for children to be environmentally aware, we offer a lesson on [Recycling for Kids](#). With new lessons published every week, children can subscribe to the LearningMole newsletter and become the first to read the latest articles on exciting topics in fields ranging from science to art and have easy access to our numerous educational resources.

All of these children's resources aim to help them gain more knowledge by acquiring information in the various fields that we offer, in addition to raising their awareness of other topics that are important in today's world. It is never too early to learn about the world around you and it is certainly never too early to become educated in all sorts of different materials. Therefore, it is our aim to provide children with the resources they need in order to acquire and maintain such knowledge.

By browsing through our website, you'll come across different articles and kid's resources, such as [Kids Hurricane Facts](#), Life Cycle of a Butterfly, Tornado Information, and Best English Fairy Tales. These educational resources are both beneficial for children and can become source materials for teachers to improve their in-class teaching methods as well. It is imperative to make the learning experience as interesting for younger students as possible.

Since the Internet has become a huge part of our lives and modern technology has afforded us much more access to information worldwide, it would be very beneficial to utilise it to help our children learn and gain as much knowledge as they possibly can. In recent years, the rate of e-learning has grown at 14 times the rate of traditional learning and is quickly becoming the dominant form of education. Major universities, such as Harvard, MIT and Berkeley have collaborated to form the e-learning platform called edX that is now widely adopted across the globe. Other universities have followed suit as well.

Financial Education for Kids - Video resources from Learning Mole

Kids recycling facts - recycling facts for kids - video resources by Learning Mole

It is essential to have an early beginning as far as self-learning is concerned, so children must learn to be more self-reliant when it comes to gaining knowledge in their free time, in an entertaining way. We believe that every child is unique. Since each individual has their own interests, we've developed fun classes and courses in all areas of knowledge to ensure that every child who accesses our website will be able to find their own niche. If you're interested in science and mathematics, feel free to check out our Maths of Kids classes or our Science Classes, and if you have a knack for artistic crafts, also feel free to browse through our crafts section where we endeavour to make your learning experience more interactive and definitely a lot more fun!

Children's videos are available on our website in order to make the learning process more interactive and fun. Whether you are a teacher, parent or child, you'll be able to easily access our educational resources and use them to teach your children or students, or learn from them yourself. If you're looking for something beyond the traditional school teaching system, an environment that is more collaborative and interesting in terms of delivering educational resources and materials in an interesting way, then you've come to the right place for sure. Help your child cultivate their inner scientist, mathematician or artist!

Why not check out the educational resource website or YouTube channel to sample the videos created by the LearningMole team. Any suggestions are more than welcome!
