[Automotive Adhesive Tapes Market 2017](#)

An automotive adhesive tape refers to a backing or a support material that is coated with an adhesive and is used to bind two different components of an automobile. They are used for wire harnessing, surface protection, electrical insulation, and device shielding. Automotive adhesive tapes are divided into four different product types such as PVC tapes, polyester tapes, polypropylene tapes, and other products. PVC tapes hold the maximum share of the market as their applications and use are higher compared with other types of automotive tapes.

The analysts forecast the global automotive adhesive tapes market to grow at a CAGR of 5.92% during the period 2017-2021.
