Global [Web Application Firewall \(WAF\) Market](#)

## Description

WiseGuyReports.Com adds" Global Web Application Firewall (WAF) Market 2015-2019 "Research To Its Database.

WAF was developed in the early 1990s to respond to the threats and sophisticated attacks that traditional firewalls failed to handle. In the business environment, the usage of computers and computer networks has become necessary to send, receive, and store business information. Organizations send e-mails and information through a web server. Security has become a major concern for them because an organization's network carries sensitive, confidential, and personal information. In most cases, attackers are not interested in exploiting software, but they are determined to gain unauthorized access to network devices.

Threats directed toward end-users have been increasing in complexity with time. These threats are dangerous because hackers are attacking over trusted protocols such as HTTP, bypassing traditional firewalls. WAF has emerged as a suitable security solution and is available for different implementation requirements.

WAF is used to protect web applications against common attacks such as cross-site scripting and SQL injection. It monitors the content of each encrypted and unencrypted inbound web traffic to

detect advanced attack types. WAF can integrate with other network security technologies such as vulnerability scanners, DoS protection appliances, web fraud detection, and security information and event management solutions. Technavio suggests that the integration of WAFs on application delivery controller (ADC) platforms could give the end-users greater visibility into web application traffic patterns before and during the occurrence of cyber-attacks and also help defend against threats.

Covered in this report

This report covers the present scenario and growth prospects of the global WAF market for 2015-2019. The report also presents the vendor landscape and a corresponding detailed analysis of the top five vendors operating in the market.

Get sample Report @ <https://www.wiseguyreports.com/sample-request/781500-global-web-application-firewall-waf-market-2015-2019>

To calculate the market size, the report considers the revenue generated from the sales of WAF solutions (includes WAF software, WAF hardware appliances, integrated WAF, and cloud-based WAF). The market size is calculated on the basis of following segments:

By end-users

- BFSI
- eCommerce
- Government

By geographies

- Americas
- APAC
- EMEA

The Global Web Application Firewall (WAF) Market 2015-2019, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the landscape of the global WAF market and its growth prospects in the coming years. The report includes a discussion of the key vendors operating in this market.

Key regions

- Americas
- APAC
- EMEA

Key vendors

- Akamai
- Barracuda Networks
- Citrix Systems
- F5 Networks
- Imperva

#### Other prominent vendors

- Applicure Technologies
- Bee Ware
- DBAPPSecurity
- Deny All
- Fortinet
- IBM
- Juniper Networks
- NSFOCUS
- Penta Security Systems
- Positive Technologies
- Qualys
- Radware
- Sophos
- Trustwave

#### Key market driving factors

- Growing dependency on Internet
- For a full, detailed list, view our report

#### Key market risk factors

- High cost of deployment
- For a full, detailed list, view our report

#### Key market trend

- Demand for cloud-based WAF solutions
- For a full, detailed list, view our report

#### Key questions answered in this report

- What will the market size be in 2019 and what will the growth rate be?
- What are the key market trends?
- What is driving this market?
- What are the challenges to market growth?
- Who are the key vendors in this market space?
- What are the market opportunities and threats faced by the key vendors?
- What are the strengths and weaknesses of the key vendors?

## Table of Contents -Major Key Points

PART 01: Executive summary  
Market highlights

PART 02: Scope of the report  
Market overview

PART 03: Market research methodology  
Research methodology  
Economic indicators

PART 04: Introduction  
Key market highlights

PART 05: Market takeaways  
Market analysis for 2014

PART 06: Market description  
Architecture of WAF  
Types of web threats  
Victims of phishing attacks 2014  
Leading countries of origin of web application attacks  
Countries affected by web application attacks  
Consequences of web application threats  
Advantages and features of WAFs  
Benefits of WAF implementation

PART 07: Market landscape  
Market overview  
Product life cycle analysis  
Global WAF market  
Five forces analysis

PART 08: Market segmentation by end-user  
Global WAF market by end-user 2014-2019  
Global WAF market in BFSI sector

Global WAF market in e-commerce sector  
Global WAF market in government sector

PART 09: Geographical segmentation

Segmentation of global WAF market by region 2014-2019  
Segmentation of global WAF market by region 2014-2019 (revenue)

PART 10: Market drivers

Growing dependency on Internet  
Need to improve quality of protection  
Need to adhere to regulatory requirements  
High-profile data breaches

PART 11: Impact of drivers

PART 12: Market challenges

High cost of deployment  
Emerging threat from open-source WAF  
Technical defects  
Adverse effect on network performance

PART 13: Impact of drivers and challenges

PART 14: Market trends

Demand for cloud-based WAF solutions  
Increased demand from SMEs  
Increased number of DDoS attacks  
Increase in M&A

PART 15: Vendor landscape

Vendors matrix  
Vendor competitive scenario  
Description of major vendors  
Vendor news updates  
Other prominent vendors
