

M2M Market in Homeland security 2017 Global Market Expected to Grow at CAGR 57 % and Forecast to 2021

WiseGuyReports.com adds "Global M2M Market in Homeland security Makret 2015-2019" reports to its Database.

PUNE, INDIA, December 13, 2017
/EINPresswire.com/ --

Market outlook of [M2M in homeland security](#)

Remote monitoring and controlling feature of M2M connected devices are enhancing security features and has been driving the growth of the global M2M market in homeland security. Technavio's market research analysts predict a market growth rate of over 57% from 2015 to 2019.

Its positive growth is on account of increased focus by state and central governments against a range of threats that include terrorist attacks, cyber-attack, and natural disasters. This market is also expected to witness a high demand for secured cloud-based networks and analytical software tools to collect, analyze, store, and retrieve confidential information.

Adoption of satellite communication for disaster management

In recent years, the use of satellite-based emergency communication services for disaster management across the globe has increased significantly. To develop an effective emergency communication, equipment for establishing remote and satellite-based communications during disasters are being deployed.

Due to the effectiveness of emergency communication systems, the market is also witnessing an increase in the adoption rate of satellite-based broadband communication in public health organizations. For instance, major governments, as well as private and public healthcare service providers are using GPS-enabled ambulances to track the patient location for remote patient

monitoring, telemedicine, and surgical assistance in the developed nations such as the US and the UK.

Geographical segmentation of the M2M market in homeland security

- APAC
- Americas
- EMEA

The Americas region is one of the early adopters of advanced technology and technological systems. With growing public awareness, the demand for homeland security systems is expected to increase in developing countries. This is on account of the high probability of terrorist attacks in developing countries which necessitates the strengthening of homeland security systems with M2M technologies.

Leading vendors analyzed in this report

- Kore
- ORBCOMM
- Westminster Aviation Security Services
- Seagull Maritime Security
- Thales
- ENSCO
- Northrop Grumman
