

Impel the Growth of Transcatheter Aortic Valve Replacement System Market in Future

Increasing Prevalence of Chronic Diseases is Expected to Impel the Growth of Transcatheter Aortic Valve Replacement System Market in Future

BROOKLYN, NEW YORK, UNITED STATES, December 16, 2017 /EINPresswire.com/ -- "Transcatheter Aortic Valve Replacement System Market: Global Demand Analysis & Opportunity Outlook 2024"

The [global transcatheter aortic valve replacement system market](#) is

segmented by surgery method such as transfemoral, transaortic, trans-subclavian, transapical access, transcarotid, and transcaaval. Among these segments, transfemoral segment is anticipated to grab the major market share in upcoming years. Additionally, in this surgery method there is no need for surgical incision in the chest. However, transapical access segment is likely to grow at substantial pace during the forecast period. Low mortality rate and fewer complications as compared to other surgical approaches are major factors which are augmenting the growth of this segment.

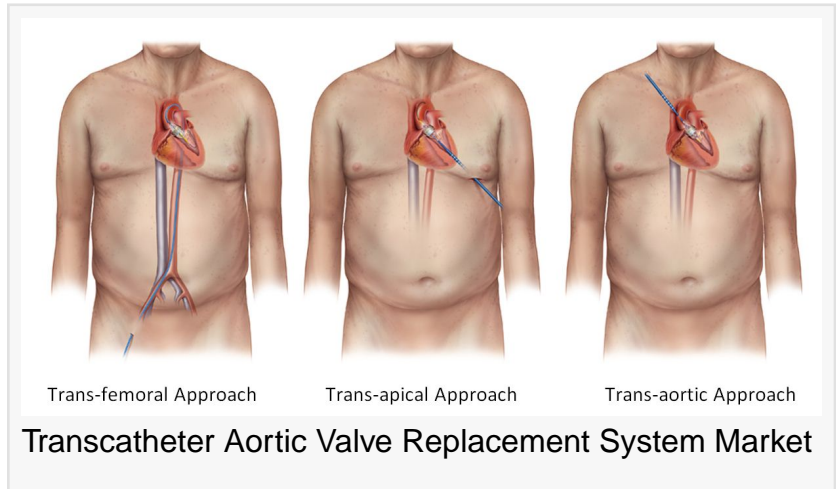

Global transcatheter aortic valve replacement system market is expected to showcase 16.4% CAGR over the forecast period. Further, high occurrence rate of chronic diseases across the globe is major factor which is predicated to drive the growth of transcatheter aortic valve replacement system market during the forecast period. Apart from this, this procedure is also a solution for those people who are not capable to undergo the surgical procedure. Likely, lower risk of dying, lower stroke rate, lower risk of bleeding, and faster recovery rate are some of the beneficial advantages which are anticipated to supplement the growth of global transcatheter aortic valve replacement system market in near future.

North America transcatheter aortic valve replacement system market dominated the overall transcatheter aortic valve replacement system market in previous years. Rising prevalence of [heart diseases and large base geriatric](#) population are key factors which are intensifying the growth of market. However, Asia Pacific transcatheter aortic valve replacement system market is likely to grow at significant pace over the forecast period owing to growing healthcare infrastructure in Asian countries.

Rising Geriatric Population

Booming number of aging people across the globe coupled with high incidence rate of heart diseases such as aortic stenosis in old population is expected to be the dynamic factor which is augmenting the growth of global transcatheter aortic valve replacement system market.

Increasing Occurrence of Aortic Stenosis

Incidence of aortic stenosis diseases across the globe is a key factor which is likely to bolster the growth of market over the forecast period. Furthermore, increasing awareness amongst the people regarding minimal invasive surgeries is also expected to impel the growth of global transcatheter aortic valve replacement system market in future.

Although, high cost associated with the transcatheter aortic valve replacement procedure and unfavorable reimbursement policies are likely to deter the growth of transcatheter aortic valve replacement system market in the near future.

The report titled “Transcatheter Aortic Valve Replacement System Market: Global Demand Analysis & Opportunity Outlook 2024” delivers detailed overview of the global transcatheter aortic valve replacement system market in terms of market segmentation by surgery method and by region.

Further, for the in-depth analysis, the report encompasses the industry growth drivers, restraints, supply and demand risk, market attractiveness, BPS analysis and Porter's five force model.
