PUNE, INDIA, December 18, 2017 /EINPresswire.com/ --

[Networked Audio Products Market 2017](#)

Networked audio products are audio devices either connected to network directly or to each other with a master speaker linked with a media streaming technology such as airplay, Bluetooth, and play-fi. These products enable a smooth streaming and transfer of digital media content from a media streaming mobile app to different networked audio devices with the help of Wi-Fi network. Also, it supports multi-room systems when connected to compatible software and speakers.

The analysts forecast the global networked audio products market to grow at a CAGR of 25.22% over the period 2015-2019.
