

Data Center 2017 Singapore Market Expected to Grow at CAGR 14.07 % and Forecast to 2021

WiseGuyReports.com adds "Data Center Market in Singapore 2015-2019 - Market Analysis, Forecast and Trends" reports to its Database.

PUNE, INDIA, December 18, 2017
/EINPresswire.com/ --

A [data center](#) is a centralized facility for data computing, processing, and storage purposes. It includes high-performance servers, networking equipment, storage arrays, and supporting services such as powering and cooling solutions. Data centers are established by enterprises dealing in cloud-based service offerings. There are also many enterprises that are involved in the construction of data center facilities with modern infrastructure and rent space for large enterprises as well as SMEs, termed as colocation and managed hosting data center facilities. With the evolution of cloud computing and increased use of big data analytics, there are a number of data centers being established to cater to the computing requirements of the enterprises to offer efficient and high availability services.

Technavio's analysts forecast the data center market in Singapore to grow at a CAGR of 14.07% over the period 2015-2019.

Covered in this report

The report covers the present scenario and the growth prospects of the data center market in Singapore. The market can be segmented based on IT equipment, cooling solutions, power management systems, racks, general construction, security, and data center infrastructure management (DCIM).

Technavio's report, Data Center Market in Singapore, has been prepared based on an in-depth market analysis with inputs from industry experts. The report covers the market landscape of the data center market in Singapore and its growth prospects in the coming years. The report
