

# Duane C. Keller, DMD Named Top CE Leader

*Dentistry Today named Duane C. Keller, DMD, FAGD a top 2017 Dental CE Leader for 2017. The Chief Scientific Officer of Perio Protect, LLC is honored.*

ST. LOUIS, MISSOURI, UNITED STATES OF AMERICA, December 20, 2017 /EINPresswire.com/ -- Dentistry Today named Duane C. Keller, DMD, FAGD one of the top 2017 Dental CE providers in the country. Being the Chief Scientific Officer of Perio Protect, LLC for the last twelve years and decades of clinical experience provide the foundation for [Dr. Keller's](#) presentations.

Tens of thousands of dental professionals have attended his courses over the years and benefited from his insights. Lou Graham is one of them: "Working with Duane opened my eyes to the world of oxygenation and the absolute benefits for my patients. In less than a year of implementing his Perio Tray® therapy, I've witnessed over 120 healthier patients in my practice, including my dad. Duane, like myself, always is asking the 'why' about oral health care, and I must say, I love his approach."

Some of Dr. Keller's course titles and descriptions are listed below:

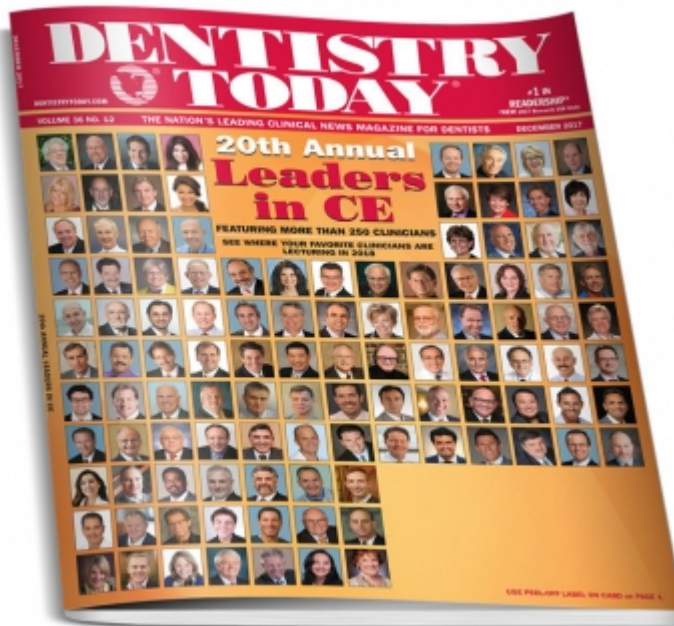

- Periodontal Therapy: Treat the Cause of Disease

How the Perio Protect Method Fits Your Patient and Your Practice

The old method of scaling, root planing surgery and then send the patient home to regrow the same pathogens IS OVER! The "recurring recall" patient and professional frustration of "doing it again" that doesn't work. Your patient returns with disease because your current methods do not control the cause of disease.

- Kill 'em Quick, Dead, and Often

Recurrence rates for periodontal disease are so high because chronic, destructive oral infections causing the disease are so challenging to manage. New research shows that patients who use an adjunctive prescription tray to place 1.7% hydrogen peroxide in the periodontal pockets, at the site of

Dentistry Today Top Leaders in CE for 2017

Keller, Duane  
2018 CE Leader

For over 40 years, Dr. Duane Keller has been an instrumental part in treating patients with TMJ and other head and neck pains. He has been active in developing treatments for periodontal "gum" disease as well. He has invented, patented, and taught the TMJ Orthodontic Method, and he has invented, patented, and teaches worldwide the Perio Protect Method of treating periodontal disease and gingivitis. Dr. Keller focuses on non-surgical TMJ and chronic pain treatment. Dr. Keller developed these TMJ methods because he and his wife Carol had TMJ problems that were caused by treatments received while in dental school and he had to learn how to correct and manage these injuries with first-hand knowledge. The Perio Protect Method was developed as a result of Dr. Keller's mother requesting a different method of treatment as periodontal surgery was too painful. Dr. Keller has multiple foreign patents issued or pending. Dr. Keller has authored more than 40 articles in refereed journals. He has presented numerous presentations about periodontal disease, TMJ, upper quadrant dysfunction, and oral/systemic complications both nationally and internationally.

#### Lecture Topics:

Periodontics  
Implant maintenance  
Biofilm Biology  
Wound Management.

#### 2018 Lecture Highlights:

Jan 26, 28: Yankee Dental Congress; Boston  
May 18: CDA Anaheim 2018; Anaheim  
June 7: AGD 2018; New Orleans

the infection, have more significant decreases in bacterial loads, in PPD, and in BOP than those with debridement and scaling alone.

- Your Office is an Oral Wound Clinic  
Periodontal bacteria evolve at a much faster rate than human immune

capabilities. The process of host responses is explained to facilitate a better understanding of the inflammatory process and opportunities for managing these situation, including an oral oxygen therapy that is often used in chronic wound clinics.

“

Working with Duane opened my eyes to the world of oxygenation and the absolute benefits for my patients.”

*Dr. Lou Graham*

- It's Not Just the Quick Kill. Oxygen is Also Key.  
Biofilms are refractory to antibiotics. Killing bacteria is important, but biofilms quickly repopulate and the infectious cycle continues. A more effective, long-term solution for periodontal disease will not only kill pathogens, but also change the microenvironment in the periodontal pocket with oxygen so that the biofilms that regrow are part of a healthy oral flora. The oxygen therapy is easy to administer with a prescription tray that delivers oxygenating agents directly into

the sulcus or pocket.

For 20 years now, the [December issue of Dentistry Today](#) has highlighted some of the top leaders in continuing education and dental consulting. Leaders must have a real passion for their work, along with a sincere desire to become one of the top professionals in their declared area or areas of expertise. They know as teachers, and often as authors as well, that excellent learning experiences come not only from sharing their professional experiences, but also from the accumulated knowledge gained from sharing knowledge with others.

To learn more about Dr. Keller or to book him as a speaker, visit the [Perio Protect Speaker Page](#), found here or call 877-434-4867.
