Description

WiseGuyReports.Com adds" Global Intelligent Video Analytics Market 2015-2019 "Research To Its Database.

Video analytics is a technology that is used to identify, record, and analyze video streams via the electronic media. It helps end-users detect events of interest and recognize behaviours on a real-time basis without a human operator having to view the video. IVA provides advanced monitoring capabilities that enable highly advanced video surveillance. Also, IVA recognizes objects in motion based on various parameters such as size and shape. Furthermore, users can use the insights collected through IVA to analyze the behaviour of these moving objects based on built-in parameters. Government organizations, large enterprises, and SMEs worldwide use IVA solutions to better monitor their resources.
