About [IT in Africa](#)

People in Africa are increasingly adopting new technologies due to the growing use and need for mobile connections and the internet to stay connected. The authorities in less developed countries of Africa have

been adopting IT to get into the global markets to gain visibility. Some of the key trends stimulating the growth of the IT market in Africa include the benefits recognized as a result of mobile health technology or remote patient monitoring methods, micro financing services through mobile-based money transfer mode such as m-pesa, and the knowledge gained through the world wide web. The knowledge acquired through the internet has already transformed several lives in the poverty-stricken areas of Africa. The agriculture and education sectors have attained significant benefits due to access to information. IT that has led to the modernization of several infrastructure projects in Africa has contributed significantly to its tourism industry. Technavio's analysts forecast the IT market in Africa to grow at a CAGR of 10.42% over the period 2014-2019.
